The program consists of two parts: Orientation and practical training. In the orientation section, between June 25 and July 6 2013, some information was given to the students on Turkish language, Anatolian civilizations, the historical and geographical structure of Turkey. After that, visits to Atatürk's Mausoleum, Ankara Castle and Middle East Technical University took place. Then, within the orientation of our organization, they visited some technical departments and took necessary theoretical knowledge to get informed about works done by General Directorate of Highways.

In the second part of the program, the students did their practical training between July 7 and August 5 2013 in motorway stations, implemented under the responsibility of the Regional Division of Public - Private Sector Partnership.

They completed their training successfully and returned to their countries.
